NEW TECHNOLOGIES KEY TO REFORM AFRICA'S AGRICULTURE SECTOR?

That's the question being asked by scientists, engineers, climatologists and politicians as climate change radically alters weather patterns and temperatures on the African continent (...).

To meet the challenge, farmers are turning to precision agriculture and cutting-edge technology that is being pioneered in both developed and developing economies to maximize yields and minimize environmental impact. Much of this emerging technology focuses on the use of drones (...).

And there is substantial evidence that drones can make a positive difference for African farmers. In Uganda, for example, a collective of some 7,000 smallholder farmers are using drones to map the location, size and productivity of their farms.

#TOLSAFUNFACT

DID YOU KNOW..

...TOLSA's Family has been growing **since 1957**?

TOLSA was founded in Spain **more than 60 years ago**, and nowadays we have sales offices and logistic platforms in 11 countries.

Most recently we have acquired the company Biotec, specialized in the prospection, exploitation, and processing of industrial minerals.

Both the acquired company and TOLSA Sucursal Argentina will be incorporated into a new company: **TOLSA MINERALES LA PATAGONIA**, that will start operating in September 2018.

EVENTS

A.I.CHEM'S NEW FACILITY OPENING: Celebrating our Customer's Success

TOLSA had the honour to attend the nice event A.I.Chem organised to celebrate the opening of their new facility in Peschiera Borromeo (Italy) last September 18th.

Image: Dr Illuzzi giving the speech

A.I.Chem and TOLSA are working partners since more than 5 years ago.

We wish A.I.Chem all the best with this new facility and much more years of success working together!!
